

Direktronik provide Tactical grade shielded CAT.6 Ultra Rugged Cable Reel which is specifically designed for digital Audio-over-Ethernet networking and real-time processing solutions.

Assembled on a lightweight & rugged & durable reel, the cable end is terminated using a male Lockable connector carriers with a robust metal shell and push-pull locking system with male RJ45 plug, while the chassis side is fitted with a female Lockable chassis connector.

Ultra flexible rubber outer jacket materials let the drum cable withstands repeated deployment and retrieval in harsh environments while maximizing cable protection.
