KEYAT-4 RS-232 to PS/2 KEYBOARD ADAPTER

The KeyAT-4 Keyboard Port Adapter to allow you to connect to a PC's keyboard port using an RS-interface, and still be able to use the existing keyboard. Typical uses for the Keyat keyboard port adapter are:
APPLICATIONS

- **Testing software** - With the help of a KeyAT, you can send keys that simulate user input from another computer using RS-232 communications.

- **Remote Access -** The KeyAT allows remote access to a system where the software does not provide any other method.

- **Monitoring Keyboard sessions** - The KeyAT can be used to monitor keyboard sessions. This can be helpful to develop regression test data or to detect keystrokes that are causing problems with target software.

- **Serial Keyboard** - You can use the KeyAT to send and receive from a Keyboard attached to an RS-232 port.

- **Attaching input devices** – Allows you to attach RS-232 devices to the keyboard port such as bar code readers, scales, and credit card readers.
FEATURES

- **Accepts ASCII, DOS scan codes and keyboard codes** - Accepts printable and encoded ASCII characters and maps to the correct key. Also you can send DOS scan codes or keyboard codes.

- **Status indicator** - LED port status indicator.

- **No power supply needed** - Runs off of the 5 volt power from the connected computer.

- **Mini-DIN (PS/2) cable provided** - The keyboard interface cable is provided, just plug it in and go.
