

Our most popular series of X-keys. Easily program keys to insert symbols or foreign characters, and open files, directories, or websites. Choose from four to sixteen programmable keys to trigger macros, shortcuts, and applications. The low profile, slim footprint fits nicely under display monitors, above keyboards, or on podiums. Blue backlighting enhances key identification in low light environments.

- A versatile control solution for any computer application
- Includes software for Windows and OS X
- Free software development kits and code samples
- 4-16 relegendable, low profile keys with blue backlighting
- Emulates Keyboard, Mouse, Game Controller, and Media commands
- Wired USB connection to computer
