

**Features:**

- Dual display, 4 digits, 7 segments LED display
- Thermocouple input(K,E,J,T,S,R,B,N,Wu3\_Re25,PT100)
- PID,PID Autotune, ON-OFF Control Mode
- Built-in Relay + SSR Drive output, output field selectable
- 0.3%F.S measuring accuracy
- Bar graphic display indication
- °C/°F display selectable
- Loop break alarm
- Parameter reset to factory default value
- RUN/STOP function
- Optional features
  - RS485 Modbus RTU Communication
  - Maximum 2 alarms

Example: MTD-48-561-C-1-96-N-N (MTD, size 48mm\*48mm, Relay+SSR Drive , 1 alarm ,85~265Vac source), TC/RTD input

**Unique Features**

1) MTD series Controller with built-in SSR Drive output and Relay output, if you want to use this controller to trigger a AC contractor or bigger load relay , select the Relay output, if you want to use this controller to trigger a solid state relay,select the SSR drive output

- 2) This controller offers a RUN/STOP feature where you can STOP the output in the middle of a process which is useful for some of application
- 3) This controller offers a feature where all the parameters can be reset to factory default value in case the parameters was messed up. this helps a new customers to explore this controller yet do not worry about getting lost in the process
